

TEXTO PARA EL PARAMOTOR DISRUPTOR

1. PARAMOTOR DISRUPTOR PRECIO BASE 2800 USD

SE DEBE SEGUIR LA PLATILA DEL TRIKE NOMADIC

- PARAMOTOR DISRUPTOR

Descripcion:

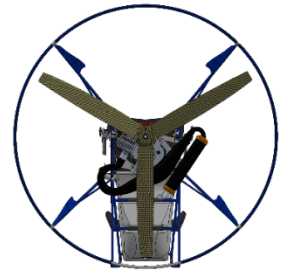

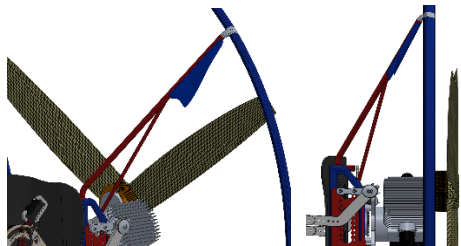

Pensado y hecho para todos los pilotos que buscan evolucionar a través del tiempo, ganando experiencias gratas; tu puedes ser Novato, ser Aventurero y explotador, Acrobata hacer vuelos dobles, adaptar el paramotor a un trike, y en todos ellos el DISRUPTOR te ayudara a crecer, a evolucionar a superar tus expectativas!!!

El DISRUPTOR viene Rompe el status quo, con innovaciones que nadie mas tiene, este paramotor no solo vino a cambiarlo todo!!! vino a que EVOLUCIONES contigo!!! Que te lleve al siguiente nivel...

EL DISRUPTOR único paramotor que puede corregir el centro de gravedad en vuelo, maneja eficazmente la compensación de torque generado por el motor, distribuye el centro de gravedad mejor. Puedes corregir altura de centro del pivote de los brazos independientemente, adicional puedes compensar a la derecha o la izquierda cada brazo independientemente.

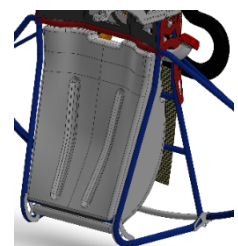

"SPAR CONECTOR" (tubo conector entre el aro y el cuerpo de chasis), están dispuestos en las zonas donde mas se necesita, adicional cada SPAR CONECTOR,

tiene un **pie de amigo** que aumenta su refuerzo, esto traduce en mayor resistencia al momento de levantar el ala (paraglider), también al tener una caída lateral, o cuando te quedas en posición tortuga y tus pies apuntan el cielo y la hélice contra el piso. Es ahí cuando sabes si tiene un paramotor de Gado militar. También importante cuando levantas el ala y las líneas hacen tensión al aro, en especial si el DISRUPTOR esta ubicado en un trike.

Los SPAR CONECTOR tiene unas terminales en plástico para su fácil desarme y ensamble hechos en Nylon reforzado, su tamaño corto hacen que sea muy resistente, la unión entre el aro de aluminio y el conector plástico se unen perfectamente sin que hayan intercepciones para que las líneas sobrepasen fácilmente.

TANQUE DE COMBUSTIBLE INTEGRADO, Significa que el tanque de

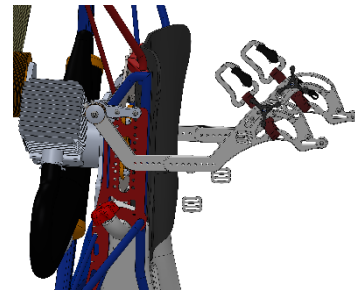

combustible ayuda a la estructura en la absorción de golpes, incrementando su Flexibilidad, y resistencia al But Landing.

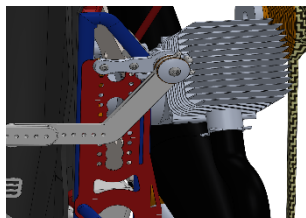

El tanque es Extraíble, para repostar sin necesidad de llevar todo el paramotor, solo el al tanque del DISRUPTOR.

otra característica es que el tanque es aerodinámico y reduce el drag, el peso de combustible esta desplazado hacia delante, para dar compensación del centro de gravedad esto hace que los mosquetones no estén tan cerca de los brazos del piloto.

BRAZOS BASCULANTES: patentados, son los únicos en el mundo que puedes corregir el centro de gravedad en VUELO e inclusive la inclinación del paramotor!!! Con nuestro Nuevo sistema "GRAVITY CONTROL SYSTEM".

Su eficaz control de torque lo logra al graduar de manera

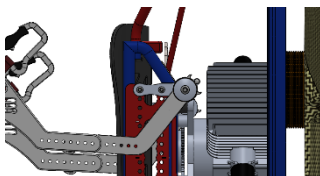

independiente la altura y el despeamiento lateral del centro del pivote de los brazos, esto asegura de manera eficaz el torque de motor. adicional la segunda mitad del brazo lo puedes colocar hacia el interior o exterior del paramotor.

estos brazos NO tienen ningún omega de acero inoxidable (shackles), que lastimen tu integridad física., o interfieran con las líneas del parapente al momento de despegar, es es una seguridad activa en e DISRUPTOR.

Muy importante, El centro del pivote del brazo esta desplazado hacia atrás de la estructura principal, cerca al motor, esto se traduce en mejor distribución de peso y hace que las bandas del Paraglider se alejen, lo que genera mas comodidad y menos estrés a los brazos del piloto.

1-CHOSE A COLOR

- a. (DEACUERDO AL COLOR ELEJIDO LAS FOTOS DEBEN CAMBIAR POR EL COLOR ESCOJIDO) es como el menu del nomadic!!!
- b. Para el futuro en el recuadro de la derecha se va a colcar el modelo 3D y este debe cambiar deacuerdo a lo escogido en color, motor propeler y accesorios etc...

Los colores son tres:

- Blanco y rojo Candi
- Balco y Morado candi
- Blanco y Azul candi.
- Customizado (100 usd)

2- Chassis. CHOOSE YOUR FLYING STYLE..... 2800 USD

SE DEBEN COLOCAR DE 3 4 FOTOS Y QUE SE PUEDAN APLIAR FOTOS UTILIZAR DEL LINK.

- a. ADD TRIKE DISRUPTOR..... 1950 USD
- b. DISRUPTOR HARNESS\$185.5 USD

SE DEBEN COLOCAR DE 3 4 FOTOS Y QUE SE PUEDAN APLIAR YO COLOCARE LAS FOTOS DESPUES .

Unico!!! Mas ligero solo 980gr, mas seguro con características únicas, como asiento en Aluminio Aeronautico este mismo asiento es adaptable al trike que tiene el paramotor (DISRUPTOR TRIKE-PARAMOTOR).

- c. POWER SEAT CONFOR BY DUDEK 733 USD

Design of the harness took into consideration all suggestions – those of the test pilots, regular users and paramotor manufacturers. Our main task was to keep high comfort of operation without increasing weight.

MORE INFO <https://dudek.eu/en/produkt/powerseat-comfort-dp/>

- d. PORWERSEAT LIGHT BY DUDEK.....845 USD

When designing this harness, we took into account suggestions of our test pilots, as well as those of paramotor manufacturers and regular users. The goal of this project was to create a very light PPG harness. WEIGHT 2.33KG

MORE INFO: <https://dudek.eu/en/produkt/powerseat-light/>

3- ENGINE

SE DEBEN COLOCAR DE 3 4 FOTOS Y QUE SE PUEDAN APLIAR FOTOS UTILIZAR DEL LINK.

a. VITTORAZI ATOM 80..... PRECIO POR DETERMINAR

An essential structure, reduced weight, and uncompromising efficiency. It's the preferred choice for flight schools thanks to its ease of use and maintenance.

d. VITTORAZI MONSTER 185 FACTORY-R..... PRECIO POR DETERMAR

Created for pilots who seek the best, it combines racing performance, exclusive design, and high-tech components. A one-of-a-kind engine, ready to turn every flight into an unforgettable experience.

MORE INFO: https://vittorazi.com/en/motori/?_gl=1*1mq7csu*_up*MQ..*_gs*MQ..&gclid=Cj0KCQjwv4XUBhDBARIsAE6bQUSQU6M5u-7ZKZXK9aE4S_3nCbVUDbD9Mve1JpI-1old0QeEtE0JzX0aAuXoEALw_wcB&gclid=0AAAAACklevTaEfdhhUmni8ijWjStiRdvQ#factory-r

e. VITTORAZI COSMOS 300..... PRECIO POR DETERMAR

The Cosmos300 combines power, high performance, and exceptional comfort; thanks to its displacement, it is ideal for paratrikes, hang gliders, and ultralights.

MORE INFO: https://vittorazi.com/en/motori/?_gl=1*1mq7csu*_up*MQ..*_gs*MQ..&gclid=Cj0KCQjwv4XUBhDBARIsAE6bQUSQU6M5u-7ZKZXK9aE4S_3nCbVUDbD9Mve1JpI-1old0QeEtE0JzX0aAuXoEALw_wcB&gclid=0AAAAACklevTaEfdhhUmni8ijWjStiRdvQ#cosmos300

f. POLINI 130 EVO..... 2580 USD

The Polini THOR 130 EVO is an advanced engine that can be equipped with two different fuel systems: Ø24 float-type carburetor or Walbro WG8 carburetor. The engine has been developed and built with craftsmanship criteria through the most modern and advanced production processes, constantly followed by highly specialized technicians.

MORE INFO:

g. POLINI THOR 202 2882 usd

Polini officially renews its commitment to the paramotor competitions with **the new Thor 202 RACING**, a direct evolution of the Thor 202 tested and developed with a clear purpose: to offer the best in slalom competitions, SERIAL category.

This project is born from the experience gained on international race fields, where every

second counts and every component is pushed to the limit. The Thor 202 RACING is designed for those seeking acceleration, immediate throttle response and a power to weight ratio of reference

MORE INFO: <https://www.polinithor.com/en/polini-thor-202-racing-2/>

- h. Polini thor 303 new4994 usd

Polini introduces the new Thor 303 EVO engine, designed for pilots who demand outstanding performance combined with absolute reliability, even in the most challenging flying conditions.

Uncompromising Polini Quality

The Thor 303 EVO has a 24-month warranty, reflecting the company's ongoing commitment to maintaining the highest quality standards.

More info: <https://www.polinithor.com/en/polini-thor-303-evo-2/>

- i. SKY 150 POR DETERMINAR

TYPE: Single-cylinder 2 stage engine with liquid cooling SWEPT VOLUME: 150 CC
MAX POWER: 28 HP @ 10800 RPM MAX RATED SPEED: 10800 RPM BORE: 58 mm
STROKE: 55 mm REDUCTION MECHANICAL: 1:4 oil lubricated THRUST(*): 78/80 Kg.
with two wood blades 130 Cm at 10800 RPM 80/82 Kg. with two E-Props carbon blades
130 Cm at 10800 RPM 84/86 Kg. with three E-Props carbon blades 130 Cm at 10800
RPM FLOAT CARBURETOR: 28 tank TOTAL WEIGHT WITH LIQUIDS: 14 Kg. EGT:
660 °C CHT: 170 °C MAX COOLANT TEMPERATURE: 95 °C MAX CAPACITY WEIGHT
OF USER: 90/120 Kg. CLUTH: Dry centrifugal

MORE INFO: <https://www.skyengines.com/new-sky-150-generale/?lang=en>

- j. SKY ENGINE ARES 260 POR DETERMINAR

is a high-performance, 260cc liquid-cooled twin-cylinder boxer engine built for paramotors. It delivers 42 horsepower, nearly non-existent vibration due to its boxer design, and up to 138 kg of thrust, making it a popular choice for aggressive slalom flying and competitive maneuvering

MORE INFO: <https://www.skyengines.com/boxer-ares260-s-motore/?lang=en>

- k. SKY ENGINE ZEUS 300 POR DETERMINAR

is a 300cc, two-cylinder liquid-cooled boxer engine built for paramotors, trikes, and tandem flight. It produces 44 hp at roughly 11,000 RPM, delivers up to 148 kg (326 lbs) of thrust with a 160cm propeller, and weighs 22 kg with fluids

MORE INFO: <https://www.skyengines.com/zeus300-boxer/?lang=en>

4- HAND THROTTLE

SE DEBEN COLOCAR DE 3 4 FOTOS Y QUE SE PUEDAN APLIAR FOTOS UTILIZAR DEL LINK.

- a. **V-Throttle** by [Vittorazi Motors](#)180. usd

is an ergonomic hand-held joystick throttle designed for paramotors. It retails for around \$150 and features a shock-resistant nylon build, ambidextrous configuration (left or right hand use), an adjustable comfort strap, and integrated safety kill or dual-start pushbuttons

More info: https://vittorazi.com/en/accessories/?_gl=1*1w0h319*_up*MQ..&gclid=Cj0KCQjwv4XUBhDBARIsAE6bQUSQU6M5u-7ZKZXK9aE4S_3nCbVUDbD9Mve1Jpl-1old0QeEtE0JzX0aAuXoEALw_wcB&gbraid=0AAAAACklevTaEfdhhUmni8ijWjStiRdvQ

- b. Polini hand Thrttle code **928.765.005**..... 186.7

a lightweight, ergonomic control unit designed for paramotors. Built from tough reinforced thermoplastic, it provides precise engine control for Polini (and other compatible) engines and comes in manual (pull-start) or electric-start variants tailored for right- or left-handed pilots.

MORE INFO: <https://www.polinihor.com/en/?portfolio=universal-manual-throttle-control>

- c. Of-grid aviator throttle 249 usd

This throttle is set up for pull start paramotors. The strap can be set up for both left and right handed use but switched later - See instructions tab on this site.

More info: <https://www.off-grid-aviation.com/throttles>

5- PROPELLER

SE DEBEN COLOCAR DE 3 4 FOTOS Y QUE SE PUEDAN APLIAR FOTOS UTILIZAR DEL LINK.

a. TWO BLADE PROPELLER \$ 350USD

Our best selling paramotor propellers are the mid-range, 25KW H30F variants. Perfect for foot launch and light wheel launch vehicles.

b. THREE BLADE PROPELLER..... \$ 450 USD

Our best selling paramotor propellers are the mid-range, 25KW H30F variants. Perfect for foot launch and light wheel launch vehicles.

MORE INFO: <https://helix-propeller.de/propellers/paramotor/>

6- ACCESSORIES. ENHANCE YOUR FLIGHT. COPIAR LAS FOTOS DESDE LOS LINKS .

1. RESERVE PARACHUTE GLOBE 160\$110 USD

t's weight ranges have been adjusted so that maximum sink speed never exceeds 5,5 m/s – something of special importance to PPG flyers. Of course the free-flyers will appreciate comfortable sink speed as well.

As standard, the system comes packed in its inner bag, ready to be inserted into harness-integrated container. Your harness should be equipped with its own release handle and V- or H-shaped risers, leading from the shoulder straps to the container. If any of these are missing, contact your harness dealer and/or manufacturer, since length and shape of those parts can vary with harness model and must exactly fit the one you are using.

As an option, you can get at Dudek Paragliders the externally mounted container, its release handle and V-risers. It can be attached to the front or side of the harness, depending on your preferences and harness characteristics.

Rescue parachute is activated manually by releasing the handle, pulling the bag out of the container and throwing it out along the direction of the airflow (together with the handle).

Para este producto utilizar las fotos de este link:

<https://dudek.eu/en/produkt/globe-light/>

2. FRONT CONTAINER WHIT A COCKPIT BY DUDEK..... \$
179.00

Inclination of the panel is adjustable to some degree, so that the instruments are best readable.

The instrument panel can be easily detached from the container, so that rescue chute remains connected to the harness. Moreover, with the panel lid closed your instruments are well protected and safe in transport. This frontcontainer can be attached to any harness, be it free-flying or PPG.

It is designed to hold the Globe 90 / Globe 120 or other rescue parachutes of similar dimensions when packed.

- Dimensions (width/depth/height in cm): 33x18x24
- Weight: 560g

LINK FOR MORE INFO:

<https://dudek.eu/en/produkt/frontkontener-z-kokpitem/>

3. PARAMOTOR BAG PACK

.....\$145 USD

Designed exclusively by Wing Concept, this case is designed to safely carry only the disassembled paramotor with its engine and propeller. It can be carried on your back or rolled on its own wheels. It could be used for transport on an airplane because it prevents spills and also has sturdy handles for easy handling.

Fotos en proceso es un producto colombiano.

4. PARAMOTOR LIGHTS KIT

..... \$135usd

If you're an explorer and adventurer, these lights are the solution for you. They provide visibility to other pilots and illuminate the wing and ground upon landing.

Fotos en proceso es un producto colombiano.

5. TRIKE

DISRUPTOR..... \$
2500 USD

Designed for those who want to fly with family and friends, and for pilots who want to transform a paramotor into a more robust and reliable aircraft, this trike easily adapts to the Disruptor paramotor and has two key attachment points: 1. at the top where the

tilting arm pivot is located, and 2. on the paratrike's rear axle. These two points provide rigidity to the entire pilot and passenger cabin.

- This trike does not include harnesses; they are sold separately.
- There are several accessories you can add for a more rewarding flying experience.

FOTOS EN PROCESO

6. Disruptor Pilot seat..... 245.5

A lightweight and very compact seat with everything necessary for comfortable flight. Our goal is to keep the entire trike as light as possible without sacrificing safety and comfort.

FOTOS EN PROCESO

7. Disruptor Passenger seat..... 245.5

Harnesses designed with special attention to weight, without compromising safety and comfort.

FOTOS EN PROCESO

Generally, the engine used can be 200cc or less, which provides limited thrust. Adding a trike and accessories can make takeoff difficult. That's why this line of harnesses aims to optimize weight.

FOTOS EN PROCESO

8. EXPLORER BAG..... \$125 USD

Designed exclusively for the DISRUPTOR paratrike, it allows you to carry excursion accessories, such as camping gear, sleeping mats, etc., for those who love adventure.

9. REAR MIRROR \$25 USD

Essential for viewing the wing's position in its first quarter of lift during takeoff, providing precise information about the wing's position when it's behind the trike, lying flat.

LAS FOTOS SON LAS MISMAS DEL VANGUARD O NOMADIC

10.FRONT BRAKE..... \$120 USD

An additional cable brake provides extra braking power; this system is conventional and comes from mountain bikes.

LAS FOTOS SON LAS MISMAS DEL VANGUARD O NOMADIC

11.PROTECTIVE COVER..... \$105.00
USD

A well-designed accessory to protect your trike. You can carry it on your trailer and avoid creating drag, as it only covers essential parts like the passenger/pilot cabin and engine. It does not cover the propeller ring.

FOTOS POR HACER
