

QUOTE 6-01-2026

1. Trike Nomadic V15.0 **STANDARD** NO engine, No propeller & NO ACCESSORIES.
diseño exclusivo, y dinámico, con un peso excepcional con motor monocilindrico
DESDE 78kg o 171.0 pounds (libras americanas) su nuevo diseño permite colocar una
hélice de 160 o máximo 165 para máximo empuje en el trike hasta 125 kg de empuje
estático o 275.5 pound (libras americanas) con la posibilidad de colocar múltiples
motores Vitorazy cosmos 300, polini 303, sky engine Zeus 300 y simonini victor one
54hp.

WHAT IS INCLUID ON THIS VALUE

1. FUEL TANK 5 GAL: It's lightweight, with a thickness of 5mm, and comes with hoses
ready to connect to the engine and the original internal filter.
2. TWO HARNEES: Its special attention to ergonomics allows for long flights without
fatigue. The passenger harness is designed to provide extra passive protection because
the passenger travels in a fetal position. It is easily accessible, and the passenger's feet
do not interfere with the pilot's taxiing.

The pilot harness is positioned in an ergonomic driving position with enhanced
visibility because the pilot is positioned above the passenger. It also provides access to
instruments and hydration by adding a water bladder or CamelBak. All harnesses are
hung for passive safety and are very easy to access and detach since they only have
one certified Cobra fastening buckle for easy exit in case of emergency.

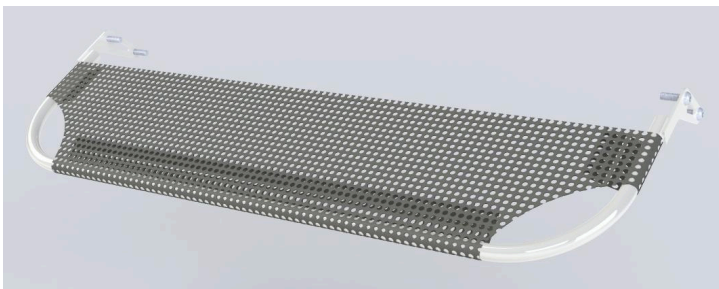

3. MAIN STARPS : The main harness is a 2-inch harness with a 4-turn loop to quadruple its
strength. It comes in two sizes: one so the carabiner is below the gravity control
system, which improves comfort because the pilot's hands aren't raised as high since
the controls and wing control system are lower and more accessible, thus reducing
strain on the rotator cuff of the shoulder; and the other system, which places the
carabiner above the gravity control system, is the standard configuration used by other
companies, and some pilots are accustomed to this system.
4. MULTI ENGINE AMOUNT: This multi-sport kit doesn't require additional holes and is
designed for the Vittorazi Cosmos 300 with its radiator mount. It's compatible with the
Polini 303, but a different mount is needed for the Sky Engines Zeus 300 or the
Simonini Victor 1 Super.

ALL THIS CHARACTERISTICAS ARE BY DEFAULT IN OUR BASIC TRIKE. 4379.5 USD

Accessories Not included:

1. Nomadic ROCK GUARD cost 85.00 usd,

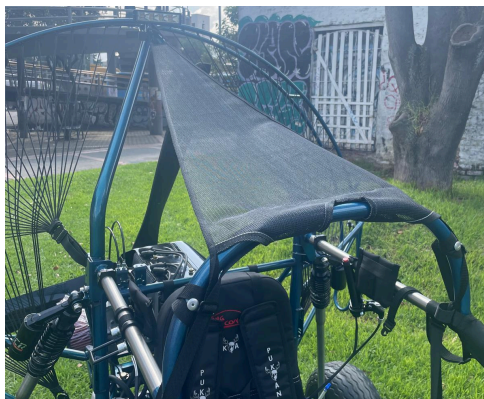

2. UNDERNEATH EXPLORER BAG..... 125 usd.

This exclusive NOMADIC case is for adventurers, explorers, and anyone who wants more than the basics and wants to travel, land, set up a tent, carry food, clothing, fishing rods, etc.

3. SUNSHADE NET OR SUNSCREEN..... \$43 USD

This system also protects the pilot from the sun, especially when the paraglider is descending sideways, preventing the lines from tangling with the helmet or other trike equipment.

4. PADDED ROLL BAR PROTECTOR WITH HANDLES..... \$47 USD

It protects the passenger and provides more comfort thanks to its handles; additionally, the front bars are padded, making the trike look more robust.

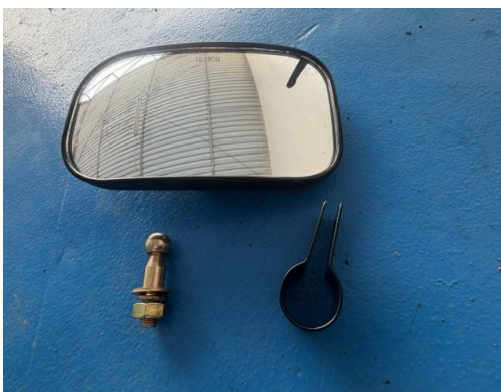

5. FRONT BRAKE..... \$120 USD

An additional cable brake provides extra braking power; this system is conventional and comes from mountain bikes.

6. REAR MIRROR \$25 USD

Essential for viewing the wing's position in its first quarter of lift during takeoff, providing precise information about the wing's position when it's behind the trike, lying flat.

7. PROTECTIVE COVER..... \$105.00 USD

A well-designed accessory to protect your trike. You can carry it on your trailer and avoid creating drag, as it only covers essential parts like the passenger/pilot cabin and engine. It does not cover the propeller ring.

8. PARACHUTE CONTAINER..... \$55 USD

An exclusive container for mounting on the right or left side of our harnesses. It can also be mounted on top, but this is not recommended if it needs to be used.

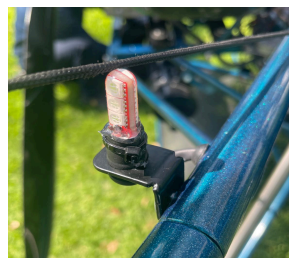

9. TWO (2) SIDE EXPLORER CASE (L-R) \$95 USD

Adventurer's case with extra straps for attaching fishing rods, tents, fuel, etc., to the outside of the case without taking up internal space. This case is aerodynamic to reduce drag.

10. AUXILIARY LIGHTS, Includes: two (2) UP67 50,000 watt waterproof LED lights (4 functions: white, yellow, and strobe: white and yellow), two (2) red and green LED position indicator lights (strobe light), luxury switch with LED light, 10 meters of #2x18 cable, 4-pin relay and its base, 4 quick connectors for #2x18 cable; all installed inside the structure with cable glands and connected to the panel for later installation to the electrical system of the selected motor. It is HIGHLY RECOMMENDED TO ADD THE MOTOR'S ELECTRICAL INSTALLATION (USD 218.2)..... \$ 187.1USD

11. BASIC INSTRUMENTS KIT NOMADIC includes: TTO digital RPM tachometer, TTO digital spark plug temperature gauge, TTO digital engine coolant temperature gauge, USB charger (4 ports).

12. TWO (2) CARABINERS \$ 90 USD
Maximum safety with high-capacity steel carabiners (2.4 kN each, which is approximately more than two tons of weight)!

13. EXTERNAL PROPELLER GUARD..... 295 usd
designed to prevent the wing or lines of the paraglider from entering the propeller directly, preventing damage. Ideal for schools and people who are just beginning to control the wing.
